BrightThinker®
CURRICULUM

Bright Thinker® provides quality, character-based digital learning options that equip students to be academically successful with ample opportunities for practice, deeper learning, and proof of mastery.

Teachers and parents are invested partners in the students' learning. Bright Thinker courses are flexible for teachers and students to use or modify to meet individual needs in a blended learning environment.

Courses are academically rigorous and provide different levels of learning to meet all the requirements. Through the curriculum, students build vocabulary and become better readers by taking ownership of their learning. Students also receive character education that is embedded within the course material to encourage a life of moral excellence.

The Bright Thinker curriculum allows students to progress at their pace. Students who are more skilled or have previous knowledge may proceed at a quicker rate in the areas of their strengths. Students who need more time to grasp academic concepts are encouraged to do their best, but are able to work at their levels of proficiency and proceed as they are capable.

Each core subject consists of 10 Units. Typically, students work on one Unit in each subject daily. Most students complete at least 60 Units per year.

> "The system is easy to use and provides the courses needed to address the needs of our struggling learners who may lag behind their peers, especially when it comes to credit recovery."
>
> —Calallen ISD, TX

K–12
CURRICULUM

Bright Thinker offers a variety of K–12 online curriculum solutions and is backed by an experienced team of educators, researchers, technologists, and instructional designers who are committed to making learning accessible for all students. Our streamlined interface gives students the tools they need to succeed by giving them individualized learning experiences. Bright Thinker features customizable lessons, levels of instruction, interactive videos, and more—all in one spot!

What is a Unit?

Bright Thinker has taken the traditional-style textbook and divided it into bite-sized, obtainable worktexts called Units. Each grade level consists of 10 Units in each core subject for a two-semester course. One-semester courses are usually 5 Units.

Bright Thinker stands out from other curriculum providers with its individualized, self-instructional, mastery-based approach. Units allow students to absorb subject material according to their learning abilities with minimal assistance rather than being pushed forward or held back by their abilities or age. Students may move ahead in some subject areas and proceed at a slower pace in others. Overall, students progress forward once they have demonstrated mastery in a subject.

PEDAGOGY
OF A UNIT

OBJECTIVES

At the beginning of each Unit, there is an objectives list. Students know what is expected and assume responsibility for their own learning.

VOCABULARY

Throughout each Unit, the introduction of new vocabulary words is controlled so that no new vocabulary word is used without the student first learning its meaning and pronunciation. These words are repeated to ensure mastery.

CHARACTER EDUCATION

Character education stories and examples are embedded throughout the Units.

LESSONS

In each lesson, learning activities and questions are in bite-sized segments to reinforce the material for deeper learning. Lesson assessment questions cover different levels of learning. Projects and labs are also included where appropriate. Students are introduced to new concepts, and some concepts are spiraled for reinforcement.

SECTIONS

A typical Unit contains two or three sections. Each section has two or three lessons. At the end of each section is a quiz. If mastery in an area is not achieved, the quiz will reveal that weak area. Students can then take the time necessary to review and learn those concepts before proceeding to the next section.

EVALUATIONS

Upon completion of the lessons, activities, and quizzes, students prepare to take the Practice Test. Here, students evaluate themselves, and a teacher determines readiness for the final Unit Test. When the Practice Test is completed successfully, students may be allowed to take the Unit Test. The Unit Test measures students' mastery of the material. No new concepts are introduced on the Unit Test.

"Bright Thinker has a rigorous curriculum that engages students online and in the classroom. Our Bright Thinker representative is always helpful and supportive. The platform is easy to use and provides a great variety of courses."

—IEM Schools, CA

ADAPTABLE
CURRICULUM

Teachers and instructors can add content, modify courses, and provide supplemental materials, projects, and discussions for collaborative learning.

There is a robust digital library of standards-aligned material where teachers may provide differentiated instruction to the course, and lesson extensions can be inserted.

Teachers find the flexible platform and content to be effective in both hybrid and direct-instruction class settings.

STANDARDS
ALIGNMENTS

The Bright Thinker courses are aligned with state standards and Common Core State Standards. Every course is built with the most relevant standards and provides resources in all phases of development. The standards and the digital library may be used together to provide intervention for students' learning. Bright Thinker offers a variety of K–12 online curriculum solutions and is backed by an experienced team of educators, researchers, technologists, and instructional designers who are committed to making learning accessible for all students.

Bright**Thinker**®

EMPOWERING STUDENTS TO BE SUCCESSFUL

The curriculum provides students with a combination of text, graphics, and videos/interactive media that meet each learner's needs.

Special Population services are moving the needle on students' academic progress through the ease of customizing the content for each student.

The courses include a mix of assessment types, projects, tests, and activities that allow the teacher to integrate authentic instructional feedback, which personalizes the learning experience for each student.

Dashboards are included so students, parents, and teachers can see overall and specific progress at a glance, allowing for timely intervention and analysis of student performance.

The intuitive navigation and the integration of knowledge checks make this curriculum ideal for young learners.

The curriculum is great to stand alone or use in blended and hybrid learning. Classes can be synchronous or asynchronous. Settings allow mastery levels to be gated or ungated.

The graphics are high quality and instructionally relevant for use in a blended-learning model.

Reporting is easy and makes all instruction data driven.

> "We love using Bright Thinker with our students who need differentiated learning options. Bright Thinker allows teachers to accommodate and modify instructional work as needed for the students while maintaining alignment with state academic standards. The students engage with the content positively and are typically quite successful. Our high school students have obtained the necessary credits that help them earn a diploma for graduation."

DIAGNOSTICS

Diagnostic/Grade Placement Test Tools

4th–8th Grade English Language Arts and 1st–8th Grade Mathematics

The Diagnostic/Grade Placement Test Tools help teachers determine a student's learning gaps. Once gaps are determined, remedial lessons can be tailored to a student's weak areas. This allows students to quickly catch up to their grade level, setting them up for success.

"**S**earching for an online curriculum is difficult with so many options available in the market, but I know Education Imagine Academy found the right option for our virtual students in Bright Thinker. We consider the curriculum our backbone to instruction, in which our teachers can build upon to customize the accredited curriculum for each student in our virtual classrooms. The support staff at Bright Thinker is extremely kind and patient as well as efficient—which is essential in a virtual school environment. From sales and professional development to tech support, our partnership with Bright Thinker is nothing short of electric. Education Imagine Academy has been able to show significant student gains with the structured curriculum that meets all of our state standards and allows for personalization for the students we teach daily. I am very thankful for our ongoing partnership with Bright Thinker that will last for many years to come."

—Amanda Young, Principal; Wichita Public Schools

ACCOMMODATED CURRICULUM

## Same base curriculum as used by the general education students

- allows special program and Gen Ed students to have the same work each day
- allows for live teaching concepts to match up day to day
- ensures special population students to not be singled out with different curriculum, tests, etc.

MODIFICATIONS INCLUDE:

- reduced number of test, practice test, and quiz questions
- reduced number of activities and writing assignments

ACCOMMODATIONS CAN INCLUDE:

- removal of time limits
- option to reduce answer choices
- ability to highlight while reading
- text-to-speech built in
- ability to take and save notes in the content while reading
- WCAG 2.0 compliant
- ability to save and continue working for extended time
- built-in answer eliminator
- ability for students to bookmark and review assessment questions before submitting

>
> —Harvest Prep, AZ

QUESTION TYPES

New question types are available with even more being added. This better prepares students for the new online state assessments.

15. Select the sun that shows the correct time and location.

6:00 a.m.

12:10 p.m.

7:00 a.m.

west   east

17. James draws a food web for the organisms he observes in his town. Select the THREE animals that the hawk and fox compete with.

hawk   fox

thrush   rabbit   squirrel   mouse

caterpillar

grass   shrubs

10. Move the answers to correctly show the carbon dioxide-oxygen cycle.

Choices
⠿ carbon dioxide
⠿ oxygen

28. The graph shows areas in an elementary school.

Select the point located at (7,3).

gym

playground

classroom

cafeteria

library
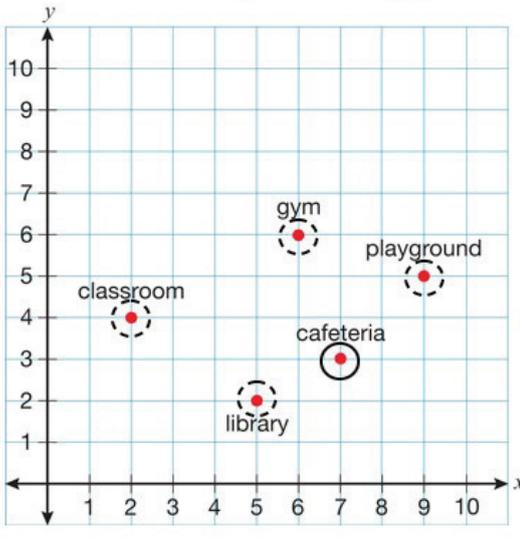

Over 8,000 interactives and videos!

ENGAGING
K–2 COURSES

K-2 courses have Teacher Guides. Explore the new look for this age group. Materials include extra practice and supplemental materials.

HOW DO I SKIP COUNT BY 2S?

SKIP COUNT BY 2S

Counting by ones can take a long time. We can skip count instead. Skip counting happens when you skip numbers.

Example

Lilly wants to cross the pond faster. She can skip a lily pad each jump.

2   4   6   8   10

Lilly skip counted by 2s. **2s** mean we add 2 each time.

K–5 PINEY WOODS
COMMUNITY

- enhance learning concepts
- teach character-building lessons

GENEROSITY: giving freely to meet the needs of others

"Generosity is giving freely from your own things in order to take care of the needs of others," said Mr. Roly Poly. "It might mean giving money, food, clothing, or other things. It means giving without being concerned about yourself."

"We could help them find a new place to live," said Rolland. "We could bring them some food and clothing."

"Those are great ideas, son," said Mr. Roly Poly. "What do you have that you might share?"

"What if I share my school supplies with Twiggy?" said Rolland.

"I am very proud of you," said Mr. Roly Poly. "Those are great ways to show generosity to Twiggy and her family."

Rolland felt happy in his heart. He was happy to share generously.

What are number lines used for?

KINDNESS

Treating people nicely and wanting what is best for the...

kindness

Seek and Find

Monica helped her sister. She showed kindness. Circle the five bandages hidden in the room.

JUSTICE

...doing what is right because it is right

...n had entered her cherry pie in the county... really hoping she would win the blue ribbon...

...Robyn's pie second place. Monica... with Robyn when she saw her red...

...pointed?" asked Monica. "I know how... o win."

...d want to win, but the judges got it... ...ngbird's honey pie was the best pie!... ...ice by choosing the best one!"

Count backward with Gracie.
